

Evaluation Videos

Note: Recording the entire list (one video at home, one video in a pet-friendly store) will likely be the easiest to achieve the best results. If you make individual videos, please allow 10 seconds before and after completing each task so we can see how your dog reacts.

At home, please record:

1. Your dog's response to a startling visual stimuli such as an umbrella.
2. Your dog's response to a startling loud noise such as a dropped metal bowl.
3. Your dog being handled for grooming (paws being held, ears examined, brushing).
4. Your dog's response to you grabbing (**not pulling**) their tail.
5. **Kibble Search:** Place kibble around 1 room in your house by hiding it near walls, chairs, under and on objects. Then release your dog into the space and let them find the hidden kibble with as little help as possible.

In a pet-friendly store, (i.e. Home Depot, Petco, Cabela's, L.L. Bean. You can always call ahead and check signage outside of the store) please record:

1. Your dog meeting (within close proximity) another dog for at least 10 seconds.
2. Your dog meeting a stranger, who is able to pet your dog for at least 10 seconds.
3. Your dog walking near a child.
4. Your dog doing some tricks inside the store (i.e. "sit" or "shake").
5. Your dog walking on leash through the store.
6. Your dog moving through a crowd.
7. Your dog doing tricks near the checkout area or another busy space
8. Without giving any cues, your dog at rest in an area of the store for 5 minutes.
